Announcement of the call for applications under the program:

Call No. 02_16_027 for International Researcher Mobility in Priority Axis 2 of the OP

Project name: Mobility Support at UP

Supported activity No. 2: Pracovní pobyty výzkumných pracovníků – senior ze zahraničí v ČR - LF

Mobility No. 1

Hosting Institution/Faculty/Department: Palacký University, Faculty of Medicine and Dentistry, Institute of Molecular and Translational Medicine

Mobility Location: Palacký University Olomouc, Czech Republic

Duration: 12 months

Term: 01/2019 – 12/2019

Working time: 1,0

Mobility description:

The researcher will test the effect of treatment protecting mitochondrial complex II and/or III against excessive oxidation. Our hypothesis is that the treatment will protect against excessive inflammation that often results in tissue damage by the normalization effect on metabolism of lipids, improvement of dysbiosis, amendment of aberrant markers of mitDNA and correction of epigenetic changes that occur due to chronic inflammation.

The aim of studies, which the researcher will participate in, is to describe the association and causal relationship between chronic inflammation, excessive oxidation of lipids and proteins that leads to changes on the level of mitDNA and hypomethylation of genes that are involved in the regulation of the process of senescence, and if cellular senescence could be overcome by anti-oxidant therapy.

The researcher is obliged to actively participate in a conference / seminar / workshop, etc. organized by the hosting institution at least once in every six months of the mobility.

Support for the Researcher's Family: NE

Salary Offered: net salary of 60 000,- CZK per month

For comparison, housing + utilities are 15 000,- to 18 000,- CZK per month.

Requirements for candidates:

Phase I

- The candidate has been granted PhD degree or its equivalent (equivalent to level 8 of ISCED) 7 or more years before the date of submitting the project application, and
- Has been active outside the Czech Republic in the field of science and research with the working time of at least 0.5 for at least 2 years (as of the date of submitting the project application) within the last 3 years, and
- Accomplishes performance criteria¹:
 - (i) Minimal normalized² h-index value 8.5, and
 - (ii) Participation in at least 1 international or national grant in the last 5 years (as of the date of submitting the project application), and
 - (iii) Publication activity (professional publications registered in the databases Web of Science, Scopus or ERIH PLUS, and at the same time publications in the form of “an article”, “book chapters”, “a letter” and “a review”) – at least 3 publication outputs in the last 5 years (as of the date of submitting the project application).

The candidates who fail to fulfil the criteria of Phase I set above will be excluded from the selection procedure. The candidates who fulfil the qualification criteria of Phase I proceed to the assessment within Phase II.

Assessment method:

Phase II

The fulfilment / non-fulfilment of exclusion criteria within Phase I, as well as the required expertise and requested documentation will be assessed by a committee consisting of at least three members.

¹ Researchers in the social sciences and humanities are exempted from this obligation.

² For instructions for calculation of the normalized h-index see Attachment No. 14 – Pravidla pro žadatele a příjemce, the specific part for Call 02_16_027.

The individual candidates will be assessed by the committee at a common meeting according to the following criteria:

Criterion 1:

The number and quality of articles in impact factor journals and other publications

Possible rating: min. 0, max. 40 points

Criterion 2:

Participation in scientific-research projects (international, national)

Possible rating: min. 0, max. 20 points

Criterion 3:

Benefits for the hosting institution within the respective field of study (scientific field) the candidate is applying for

Possible rating: min. 0, max. 20 points

Criterion 4:

The need for research in the particular field of study (scientific field)

Possible rating: min. 0, max. 10 points

Criterion 5:

Recommendation by the previous supervisor or the Head of the workplace/scientific-research team where the candidate operates

Possible rating: min. 0, max. 10 points

The maximum rating achievable is 100 points. When assessing the candidates with regard to criteria 1 and 2, the particular candidate achieves the number of points for fulfilling the particular criterion in accordance with the objectively identifiable value set above. When assessing the candidates with regard to criteria 3, 4 and 5, each member of the selection committee awards the points to the particular candidate individually at his/her discretion. The final number of points for the particular candidate is the arithmetic mean of the rating awarded by the individual committee members. The winner of the selection procedure is the candidate having achieved the most points in the assessment of the individual criteria.

A written record of the assessment procedure will be made, including the information about the composition of the assessment committee, the criteria of candidate assessment, the reasoning of ratings, and the name of the winner.

The results of the assessment procedure will be published on the UP website.

Documents requested:

Professional CV

Diploma or nostrification

Documents proving research activity outside the Czech Republic

EVROPSKÁ UNIE
Evropské strukturální a investiční fondy
Operační program Výzkum, vývoj a vzdělávání

MINISTERSTVO ŠKOLSTVÍ,
MLÁDEŽE A TĚLOVÝCHOVY

Calculation of the normalized h-index signed by the candidate

A list of publication outputs in the last 5 years

A list and a brief description of scientific-research projects (national and international) the candidate led and/or collaborated on in the last 5 years

Cover letter including specification of the benefits for the hosting institution

Brief description of the research the researcher intends to work on; justification of its need in relation to the research field

Recommendation by the Head of the workplace/research-scientific team where the candidates operates

Mobility schedule approved by the hosting institution

All documents listed above must be submitted in either Czech or English.

Successful candidates shall not be working at any other university or institution at the time of the expected beginning of their mobility. Any exception has to be requested within the admission procedure.

The applications may be submitted in the electronic form to the address zuzana.prichystalova@upol.cz or jiri.zakopal@upol.cz until April 9th, 2018.
